

Double Uphill Elevating Capsule Polisher and Sorter ACP-200V

ACP-200V is the best solution for pharmaceutical manufacturers dealing with high production demands. This machine has advanced polishing and sorting functions and a double uphill lift function, which allows it to process a lot of material continuously and work with the most complex and highest packaging lines. It can meticulously clean capsules, eliminate static electricity, and remove all defective products. It can also efficiently move the good products to the next step.

Features

- ✓ **All-in-One Solution:** It cleans, polishes, lifts, detects metal, and even sorts empty capsules.
- ✓ **Exceptional Throughput:** Optimized for ultra-high volume, capable of processing up to 600,000 capsules per hour to keep your production flowing fast.
- ✓ **Fast, Accurate Sorting:** Efficiently sorts out empty, broken, or lightly powdered capsules.
- ✓ **Safe & Hygienic:** Enclosed channels keep toxic processes contained, ensuring safe, clean pharma production.
- ✓ **Works with Everything:** Compatible with all capsule types and connects easily to any capsule filling machine.
- ✓ **Smart Automation:** A micro-processing system lets it 'learn' and set itself up automatically, saving you time.
- ✓ **Robust & GMP-Ready:** Built tough with durable, food-grade materials that meet strict GMP standards.
- ✓ **Quick Maintenance & Cleaning:** Features a quick-connect design for fast assembly/disassembly and easy, safe cleaning

Specifications

Model	ACP-200V
Application	Suitable for polishing and sorting all capsule types.
Max Output	600,000 pcs/h
Capsule Sizes	Compatible with sizes 00#, 0#, 1#, 2#, 3#, 4#
Power Supply	1PH 220V/110V 50Hz/60Hz, 0.2 kW
Inlet Height	750mm Size: 300 x 250 mm
Outlet Height	1005mm Size: 65 x 50 mm
Overall Dimensions	Length: 1,229mm Width: 709mm Height: 1,489mm Weight: 80kg
