

# Efficient Semi-Auto Gummies Candy Depositing Set AGC-LD20

The AGC-LD20 is a space-saving candy production machine. It is designed for gummies, hard candy, and vitamin chews. It supports continuous production with desired candy shapes and sizes. This gummy-making machine produces high-quality candy with low labor and energy costs. It also requires minimal maintenance. So it's a great choice for startups and small factories.

## Features

- ✓ **Compact design:** Small design makes it perfect for new candy makers or labs, and startups with limited space.
- ✓ **Flexible candy production:** It can make different shapes and types of candy, such as gummy bears and lollipops. Molds can be customized to meet your needs.
- ✓ **Good Output:** It produces about 30–50 kg of candy per hour, suitable for small-scale commercial use or testing.
- ✓ **Simple syrup cooking pot:** This equipment comes with a 100L electric heating pot to cook syrup. It has wheels for easy movement.
- ✓ **Demolding device included:** A demolding tool with a cylinder helps remove candy from molds quickly and smoothly.

## Technical Parameters

<b>Model</b>	AGC-LD20
<b>Capacity</b>	1-20 pieces per cycle (customizable gummy quantity)
<b>Depositing Speed</b>	10-30 cycles/min
<b>Power Supply</b>	3.2 kW
<b>Air Pressure</b>	> 0.4 MPa
<b>Dimensions</b>	800×800×1700 mm
<b>Weight</b>	120 kg
