

Gummy Candy Production Line AGC-GD80

The GD80 automatic gummy production line is designed for making high-quality gelatin-based gummies. It combines mechanical, electrical, and pneumatic systems. It is perfect for producing single-color or dual-color gummies with consistent shape, taste, and texture. The line reduces labor and space needs while improving efficiency and product quality. It also meets GMP food standards and CE guidelines for food safety.

Features

- ✓ **High efficiency:** This gummy maker produces up to 80 kg of gummies per hour with stable output.
- ✓ **Precise ingredient mixing:** It adopts a built-in CFA mixing system for flavors, colors, and additives.
- ✓ **Advanced cooling system:** It has a long tunnel with a strong cooling effect and lower humidity.
- ✓ **Compact and hygienic design:** It is built with stainless steel and follows GMP hygiene standards.

Specifications

Model	AGC-GD80
Capacity	80kg/h
Gummy Weight	2-12g
Depositing Speed	45-55 times/min
Air Pressure	0.4-0.6 MPa, 0.3 m ³ /min
Electric Power Needed	75kW
Total Length	15 meters
