

# Liquid R&D Softgel Capsule Gel Oil Filling Machine ASE-200C

The ASE-200C is a smart and reliable machine made for filling softgel capsules with oils, pastes, or suspensions. It can create capsules in different sizes, shapes, and colors. The machine works fast and helps make capsules that are easy to swallow, last longer, and store well. The equipment features high speed, accurate filling, and stable performance. It is a top choice for making softgels in medicine, health supplements, beauty, and even paintballs. In addition, the machine is well-designed to offer smooth operation and strong, clean products every time.

## Features

- ✓ **High output efficiency:** It produces up to 370 million capsules per year under standard conditions.
- ✓ **Accurate filling:** It fills each capsule with less than 2% variation in dosage, ensuring consistent drug content.
- ✓ **Eco-friendly water cooling:** The machine adopts advanced water cooling. It keeps production stable and clean without air pollution.
- ✓ **Durable and long-lasting design:** It is built with aerospace-grade alloy molds for long life and reliable performance under heavy use.

## Technical Parameters

Model	ASE-200C
Mould Rotational Speed	0-5 r/min (Stepless frequency speed control)
Control System	Omron PLC + Weinview touch screen
Capacity	Approximately 48,600 pills/h for #12 Oval
Supplying Volume	0-2ml per single-pillar stopper
Pillar Quantity	12
Glue Cooling	Water cooling at approximately 18°C
Power	7 kW
Dimensions	2,100×1,100×1,800 mm
Weight	980 kg
