

# Perfume Bottle Capping Machine YGJ-18

Looking for a compact crimping tool to seal your perfume bottles? The YGJ-18 bottle crimping machine is what you're looking for. This model is purpose-built for crimping aluminum collars on glass bottles. That's why this type of machine is so popular in the fragrance and cosmetic industries.

Designed for tabletop use, the YGJ-18 runs on compressed air. This means if you're handling in flammable environments like alcohol-based perfume production facilities, this bottle crimper is very safe to use.

This semi-automatic capping machine comes with a simple foot pedal control, stable base, and adjustable crimping heads. It supports a wide range of bottle sizes and atomizer types. The YGJ-18 is a solid pick for labs, small-batch production, or anyone needing a reliable, low-maintenance bottle crimper.

## Features

- ✓ **Pneumatic Crimping:** Powered by compressed air. Safe for alcohol-based or flammable products.
- ✓ **Consistent Seal Quality:** Delivers firm and uniform crimps on aluminum collars and spray pump caps.
- ✓ **Quick Height Adjustment:** Easily adapts to different bottle heights, no tools required.
- ✓ **Compact Design:** Small footprint suitable for limited workspace.
- ✓ **Low Maintenance Build:** Built with stainless steel for easy cleaning and long-term use.
- ✓ **Wide-Ranging Cap Support:** Works with various spray caps, crimp-on pumps, and aluminum collars.

## Technical Parameters
