

Pill Counting Machine

Anxine provides advanced pill counting machines for accurate and fast counting of tablets, capsules, softgels, gummies, and candies. They are suitable for pharmaceutical, supplement, food, and chemical industries, helping improve bottling efficiency and reduce errors.

Desktop Pill Counting Machine NPC Series

The NPC Series is a compact, high-precision lineup of desktop capsule filling machines engineered for small-batch and pilot-scale capsule production across pharmaceutical, nutraceutical, herbal, and laboratory applications. All models feature a user-centric desktop construction with food-grade 304 stainless steel components, ensuring corrosion resistance, easy cleaning, and compliance with strict hygiene requirements. The core filling mechanism integrates precision dosing systems that enable accurate filling of hard gelatin, HPMC, or vegetarian capsules (sizes 00#–5#). The series supports a wide range of formulations, including powders, granules, herbal extracts, and mixed ingredients, with minimal product waste and consistent fill weight uniformity.

Equipped with safety features including secure locking mechanisms, dust-resistant enclosures, and stable base designs, the NPC Series ensures operator safety and minimizes cross-contamination risks. The desktop form factor eliminates the need for large floor space, making it easy to integrate into crowded labs or workstations.

All models offer quick capsule size changeovers, allowing for flexibility in product development and production. Its durable construction, user-friendly operation, and scalable performance make the NPC Series an essential tool for researchers, small manufacturers, and professionals seeking reliable desktop capsule filling solutions.

Technical Parameters

Model	NPC-3A	NPC-5A	NPC-100D
Operation Type	Semi-automatic		
Production Capacity	1000-2000 pcs/min	500-1500 pcs/min	12-26 vials (bags)/min
Electrical Supply	220V/110V 50Hz/60Hz		
Total Power	0.15 kW	0.1 kW	0.15 kW
Overall Dimensions (L×W×H)	820x830x350mm	400x360x550mm	600x500x700mm
Overall Weight	5 kg	22 kg	48 kg
Material of Construction	304 stainless steel		

Automatic Pill Counting Machine NPC Series

The NPC Series is a high-precision lineup of automatic pill counting machines engineered for efficient, accurate counting and bottling of pharmaceutical tablets, capsules, softgels, and small solid dosage forms. Designed for pharmaceutical, nutraceutical, and healthcare industries, these machines streamline the counting and packaging workflow, ensuring reliability, speed, and compliance with strict quality control requirements. All models feature a core counting mechanism powered by advanced optical sensor technology or precision mechanical counting systems, delivering exceptional counting accuracy and minimizing product waste. The machines support a wide range of dosage forms, including round/oval tablets, hard/soft capsules, and small spherical pellets, with adjustable parameters to accommodate different sizes, shapes, and weights.

Equipped with safety and quality-enhancing features—including overload protection, anti-jamming mechanisms, dust-tight enclosures, and stable base designs—the NPC Series ensures operator safety and product integrity. The series also minimizes noise and vibration, creating a comfortable working environment. Versatile and reliable, the NPC Series excels in counting pharmaceutical tablets, nutraceutical capsules, herbal supplements, and diagnostic reagents. Whether for small-batch pharmacy operations, pilot runs, or mass commercial production, the series delivers consistent, high-precision results that meet strict industry standards. Its durable construction, scalable performance, and user-friendly design make the NPC Series an essential tool for manufacturers and healthcare facilities seeking to optimize counting efficiency, reduce labor costs, and ensure product quality.

Model	NPC-8	NPC-16	NPC-3AC
Operation Type	Fully automatic		
Counting Capacity	10-50 bottles/min	60-100 bottles/min	1300 capsules/min
Counting Range	1-999 pills per batch		
Electrical Supply	220V/110V 50Hz/60Hz		
Total Power	0.4 kW	1.5 kW	0.2 kW
Overall Dimensions (L×W×H)	1600x1500x1600mm 2600x1600x1600mm 2600x1600x1600mm		
Overall Weight	450 kg	780 kg	55 kg

Semi-Automatic Tablet Tube Filling Machine

CED-S10A

The CED-S10A is a high-performance semi-automatic rigid tube filling machine meticulously engineered for tablet-based products, including milk tablets, effervescent tablets, chewable tablets, and vitamins.

Tailored to meet the packaging needs of pharmaceuticals, food items, and daily-use products, this machine seamlessly integrates four key functions—precise tablet counting, efficient filling, secure capping, and reliable sealing—into a single, compact unit, making it an exceptional fit for smaller factories and production facilities seeking both functionality and space efficiency.

Equipped with a gentle vibrating track system, the machine feeds tablets into tubes smoothly without causing any damage. It offers strong versatility, being compatible with various tube sizes and types, while its photoelectric sensors and PLC control ensure accurate tablet counting. Featuring a clear control panel with adjustable settings, the machine is simple to operate.

Its open structure and stainless-steel components enable easy, tool-free cleaning and maintenance.

Additionally, a built-in emergency stop button provides reliable safety protection for operators, combining user-friendliness with high automation and practicality.

Model	CED-S10A
Applicable Bottle Size	Height: 100-150mm (customizable) Diameter: ϕ 28mm (customizable)
Applicable Tablet Specifications (customizable)	Tablet Diameter: Φ 12-30mm Tablet Thickness: 3-8mm Tablet Quantity: 8-30 tablets Tube Height: Adjustable from 84-144mm
Output	500-600 bottles/h
Filling Range	15 tablets, 20 tablets
Dimension	1,025 \times 1,025 \times 1,680 mm
Weight	150kg
