

Semi-Auto Plastic Tube Filling Sealing Machine CNF-30A

The CNF-30A is a great option for businesses that are looking for a reliable and affordable way to package tubes. This machine is designed for efficiency and accuracy. It's excellent at dispensing products of various viscosities (ranging from thin liquids to thick pastes) into tubes. Once filled, it creates strong, neat seals, ensuring that the product remains in good condition and looks professional. The semi-automatic operation is great for different batch sizes and easy changeover. This makes it an essential tool for the pharmaceutical, cosmetic, food, and chemical industries.

Features

✓ Hygienic & Durable

Construction: All parts that touch your product are made from high-quality 316L stainless steel, so they're hygienic and long-lasting.

- ✓ **Easy Cleaning & Maintenance:** You can quickly take the parts apart and clean them because they connect easily.
- ✓ **Clean & Reliable Operation:** It has high-quality pneumatic parts and a device that blows air at the tail cutting section to prevent material buildup, ensuring smooth operation.
- ✓ **Precise & Stable Movement:** The motor can change its speed, which makes the tubes move in a steady and predictable way.

Technical Parameters

Model	CNF-30A
Filling Capacity	0~250 mL
Production Capacity	0-20 pcs/min
Power Supply	~220V±10%
Power	1.2 kW
Dimensions	1,200 x 800 x 1,450 mm
Weight	350kg
