

Tablet And Capsule Inspection Machine

KPS-220B

The KPS-220B is an advanced tablet and capsule inspection machine that helps manufacturers deliver products of high quality standards. The tablet visual inspection machine can identify spotted, damaged or substandard products with great accuracy. The KPS-220B machine can rotate 360 degrees, allowing for comprehensive multi-angle inspection of capsules or tablets, ensuring that each product meets production standards. Whether it is tablets, hard capsules or soft capsules, our tablet and capsule inspection machines can provide you with easy and accurate inspection solutions.

Features

- ✓ **Comprehensive Inspection:** Capable of detecting spotty, broken, or non-standard capsules and tablets.
- ✓ **360-Degree Rotation:** Ensures a full visual inspection of capsules and tablets.
- ✓ **Tablet Flipping Device:** Allows viewing of both tablet surfaces for thorough quality checks.
- ✓ **Infinitely Adjustable Speed:** Allows precise control of rotation and inspection speeds.
- ✓ **Advanced Lighting and Mirrors:** Adjustable mirrors and lighting eliminate hidden areas, ensuring no defects are overlooked.
- ✓ **Defective Product Elimination:** Equipped with a flexible handheld vacuum nozzle for easy removal of defective products.
- ✓ **User-Friendly Design:** Simple to operate and clean, minimizing cross-contamination risks.

Technical Parameters

Model	KPS-220B
Application	Pills, capsules, tablets, soft capsules
Product Size	Minimum tablet thickness 3 mm, maximum tablet diameter 25 mm
Inspection Speed	Up to 120,000 capsules per hour or 50 kg of tablets per hour
Hopper Volume	30L or 60L
Voltage	220V 50Hz / 110V 60Hz
Weight	125 kg
Dimensions	1,400 x 650 x 1,250 mm
