

# Tabletop Cap Screwing Machine SGJ-6100

If you're handling different cap sizes and need a simple solution to tighten them fast and securely, the SGJ-6100 is built just for that. This semi automatic screw capping machine is powered by two motors and operates via a pneumatic system. It offers variable torque control for various cap types.

One of the iconic desktop capping machines offered by Anxine, the SGJ-6100 is ideal for pharmaceutical, food, cosmetic, and chemical packaging. The model boasts dual-mode operation: manual (via foot pedal) and auto. This unit is a favorite among small-scale production teams and workshops.

## Features

✓ **Variable Torque Control:** Delivers adjustable and stable

torque to seal every cap evenly.

- ✓ **Quick Bottle and Cap Changeover:** Switch between different bottle types and cap sizes without tools.
- ✓ **Dual-Mode Operation:** Features a foot pedal switch and hands-free operation for continuous production runs.
- ✓ **Compact, Space-Saving Design:** Lightweight and easy to install on a tabletop.
- ✓ **User-Friendly Controls:** Simple interface allows for quick setting adjustments and mode switching.
- ✓ **Low Maintenance:** Open design allows easy access to all components for upkeep.

## Specifications
